

**About the Divisions of Medical Assistance and Health Benefits**

The North Carolina Department of Health and Human Services' (DHHS) has delegated the responsibility for Medicaid administration and reform to two divisions, the Division of Medical Assistance and the Division of Health Benefits. The Division of Medical Assistance manages the North Carolina Medicaid and Health Choice for Children programs. Medicaid provides health insurance for low-income children, families of dependent children, pregnant women, seniors, and individuals with disabilities.<sup>1</sup> NC Health Choice, North Carolina's version of the Children's Health Insurance Program (CHIP) benefits children whose family income is too high to qualify for Medicaid but is at or below 211% of the federal poverty level. DMA is divided into the Director's Office and 8 specialized sections to oversee the various administrative functions of the Division.<sup>2</sup>

*Sections of DMA:*

Administration	Coordinates the State Medicaid Plan and waivers, communicates with the Center for Medicaid Services, directs the Division's legislative process, and oversees implementation of policy changes and other projects <sup>3</sup>
Budget Management	Manages DMA's budget and financing, oversees contracting and purchasing, and establishes financial policy <sup>4</sup>
Clinical Policies and Programs	Oversees the administration of clinical services and other programs covered by Medicaid, including setting coverage policies and providing program information to providers, recipients, and the public <sup>5</sup>
Finance Management	Establishes reimbursement methodologies and rates for covered services, conducts audits of healthcare facilities, and assesses and reports program costs <sup>6</sup>
Human Resources	Provides services to recruit, retain, and develop an effective workforce for DMA <sup>7</sup>
Information Technology and HIPAA	Oversees the Medicaid Management Information System, the overall information and claims processing system for the Medicaid program, and HIPAA protections for the electronic exchange of information <sup>8</sup>
Compliance and Program Integrity	Monitors the use of Medicaid dollars and program quality to ensure accountability and prevent fraud and program abuse <sup>9</sup>
Recipient and Provider Services	Establishes eligibility policy, manages the Eligibility Information System, analyzes claims, enrolls providers, and oversees managed care within the Medicaid Program <sup>10</sup>

The Division of Health Benefits (DHB) was created pursuant to legislation signed in 2015 to oversee Medicaid reform as the system shifts from a fee-for-service model to a capitated rate, managed care model.<sup>9</sup> The state Medicaid agencies are advised by the Medical Care Advisory Committee, which provides recommendations on service coverage, care quality, and budgetary goals.<sup>11</sup>

**The Role of the Division of Medical Assistance in Influencing Health**

DHHS delegates the administration of Medicaid to DMA, which includes tasks such as outreach and enrollment of beneficiaries, defining the scope of coverage, establishing plan and provider payment rates, enrollment and payment of providers and plans, monitoring the quality of services, processing appeals, and reporting.<sup>12</sup> Under North Carolina's current system, DMA reimburses the enrolled NC Medicaid providers for services provided to Medicaid beneficiaries on a fee-for-service basis.

<sup>a</sup>2015 N.C. Session Law 245

Mental health and substance use services, as well as intellectual and developmental disabilities (I/DD) services covered by Medicaid are administered using a managed care model. Currently, DMA contracts with the seven regional local management entities/managed-care organizations (LME/MCOs) to direct the use of state and federal Medicaid dollars to provide these services to Medicaid beneficiaries.<sup>13</sup> Pursuant to North Carolina’s 1915(b)/(c) waiver, DMA provides a per member, or capitated, monthly payment to each of the organizations to manage the services of the Medicaid beneficiaries within their catchment areas.<sup>b</sup> Direct community-based services are then provided through contracts between the LME/MCOs and local private providers, or in one of the fourteen state-operated healthcare facilities.

**The Division of Health Benefits and Medicaid Reform**

In 2015, North Carolina passed Medicaid reform legislation requiring a shift to a capitated, managed care system for many Medicaid recipients, with the goal of controlling the cost of the state’s Medicaid program. The legislation proposed six Medicaid regions across North Carolina, in which up to 12 provider-led entities and up to 3 managed care organizations (MCOs) will manage and provide care. Eligible beneficiaries will be able to choose among four health plans in their region.<sup>14</sup> DHB created a plan outlining this transition and strategies to improve health care quality, access, and cost efficiency, initially submitted in June of 2016 to the Centers for Medicare and Medicaid Services (CMS). An amended version that expands on key elements of the managed care transition has since been submitted as of November of 2017.<sup>15</sup> The application is under review and, if approved, North Carolina will have 18 months to implement the proposed changes to the Medicaid program.<sup>14</sup>

**Funding and Spending**

DMA manages a budget of over \$14 billion, with a net appropriation of over \$3 billion from the General Assembly in State Fiscal Year (SFY) 2017.<sup>16</sup> Medicaid and Health Choice are jointly funded by the federal and state governments. In both cases, the federal government provides most of the funds, as determined by the federal medical assistance percentage (FMAP)<sup>c</sup>. As of FY 2018, the federal government provides 67.61% of the funds for Medicaid in North Carolina, and 100% of the funds for Health Choice.<sup>17,18, d</sup>

The programs’ administrative costs account for a nominal portion of DMA’s budget, approximately 0.33% in SFY 2017.<sup>16</sup>

Claims, premiums, and additional hospital payments reflect the majority of the costs for the Medicaid and Health Choice programs, accounting for 94% of expenditures in SFY 2017.<sup>19</sup> Spending on claims varies depending on eligibility group.

	Summary by DMA Program		
	SFY14	SFY15	SFY16
<i>\$ millions</i>			
<b>Medicaid:</b>			
Expenditure	\$ 13,303.1	\$ 13,744.4	\$ 13,771.1
Federal Revenue	8,432.7	8,751.7	8,771.3
Other Revenue	1,466.6	1,434.9	1,507.0
Appropriations	<b>\$ 3,403.8</b>	<b>\$ 3,557.7</b>	<b>\$ 3,492.8</b>
<b>Health Choice:</b>			
Expenditure	\$ 246.4	\$ 175.2	\$ 172.8
Federal Revenue	187.3	132.6	160.8
Other Revenue	0.5	0.9	0.8
Appropriations	<b>\$ 58.7</b>	<b>\$ 41.7</b>	<b>\$ 11.1</b>
<b>Special Fund:</b>			
Expenditure	\$ 123.6	\$ 211.8	\$ 205.3
Federal Revenue	-	-	-
Other Revenue	106.1	250.6	206.4
Appropriations	<b>\$ 17.5</b>	<b>\$ (38.8)</b>	<b>\$ (1.0)</b>
<b>Total DMA:</b>			
Expenditure	\$ 13,673.1	\$ 14,131.3	\$ 14,149.2
Federal Revenue	8,620.0	8,884.3	8,932.1
Other Revenue	1,573.1	1,686.4	1,714.2
Appropriations	<b>\$ 3,480.0</b>	<b>\$ 3,560.6</b>	<b>\$ 3,502.9</b>

*Blended FMAP: SFY14 = .6571, SFY15 = .6586, SFY16 = .6615*

Accessed July 1, 2017.

<sup>b</sup> 2011 N.C. Session Law 264

<sup>c</sup> FMAPs are calculated annually based on a state’s per capita income relative to the U.S. average per capita income. FMAPs have a statutory minimum of 50% and maximum of 83%.

<sup>d</sup> Section 2101(a) of the Affordable Care Act amended Section 2105(c) of the Social Security Act to enhance the FMAP for CHIP (NC Health Choice) by 23% from October 1, 2015 until September 1, 2019.

For instance, children make up 54% of Medicaid beneficiaries, yet account for only 25% of claims expenditures. Most claims expenditures (60%) are for the aged, blind, disabled, who comprise 21% of Medicaid beneficiaries.<sup>20</sup>

## Impact

DMA plays a crucial role in access to healthcare services for more than two million North Carolinians who are beneficiaries of Medicaid or Health Choice.<sup>21</sup> Low personal income is associated with an increased burden of illness and higher healthcare costs. Medicaid and Health Choice mitigate financial barriers to accessing healthcare, increase the likelihood of seeking preventive care and having a usual source of care, and deliver services of comparable quality to those provided through private insurance.<sup>22</sup> Additionally, in North Carolina, 90% of primary care providers serve Medicaid patients, which is a higher percentage than in most states.<sup>23</sup> As North Carolina's Medicaid Program evolves, it will continue to play an important role in improving the health of North Carolinians.
