

North Carolina is Aging!

- ◆ The state's total population has exceeded 10 million!
- ◆ North Carolina ranks 9th nationally, both in total population and in the number of people 65 and over.
- ◆ In 2025, one in five North Carolinians will be 65 and over.
- ◆ In 2019, the state is estimated to have more people 60 and over than under 18 years.
- ◆ In 2017, 78 counties in the state had more people 60 and over than under 18 years. By 2025, this number is expected to increase to 89 counties and by 2037 to 94 counties.
- ◆ In 2017, an estimated 39,381 people 60 and older migrated from other states and abroad to North Carolina.
- ◆ In the next two decades, our 65 and over population will increase from 1.6 to 2.6 million, a projected growth of 64%. The projected growth among the age groups 65-74 (38%), 75-84 (100%) and 85+ (111%) indicates that as the baby boomers continue to age, there will be an increased proportion of older adults in the state creating challenges for long-term services and supports.

NC Population Change 2017-2037

Age	2017		2037		% Change 2017-2037
	#	%	#	%	
Total	10,283,255		12,684,352		23%
0-17	2,312,886	23%	2,606,213	21%	13%
18-44	3,658,073	36%	4,419,187	35%	21%
45-59	2,072,070	20%	2,304,524	18%	11%

- ◆ Given the potential social and economic impact of this unprecedented growth in the aging population, it is critical that NC focus efforts to improve those social determinants of health shown to have a direct positive effect on the health and well-being of individuals as they age including food security, access to health care services and transportation, availability of home and community-based services and other supports that promote aging within the community and postpone or avoid the necessity for long-term care.
