NORTH CAROLINA SAFETY NET

Presentation to the NCIOM Legislative Health Policy Fellows Program
Pam Silberman, JD, DrPH
Professor, Dept. Health Policy and Management
Gillings School of Global Public Health
April 23, 2018
Uninsured in North Carolina

- Approximately 1.1 million people uninsured in 2016. Of these:
  - ~906,000 were nonelderly adults ages 19-64 (83%)
  - ~142,000 were children ages 0-18 (13%)
- Most of the uninsured in a family with at least one full-time worker
  - 70% have at least one full-time worker
  - 12% have at least one part-time worker

Uninsured Adults Generally Have Poorer Health Status, Less Access To Care

- 46% of uninsured adults needed to see a doctor but couldn't because of cost.
- 23% of uninsured adults have not seen a doctor for a routine checkup in 5+ years (or ever).
- 15% of uninsured adults do not have a personal provider.
- 30% of uninsured adults have a fair or poor health status.
- 70% of uninsured adults have an excellent, very good or good health status.

Comparison with insured adults:
- 12% needed to see a doctor but couldn't because of cost.
- 5% have not seen a doctor for a routine checkup in 5+ years (or ever).
- 17% do not have a personal provider.
- 17% have a fair or poor health status.
- 83% have an excellent, very good or good health status.

Number and Percent of People Under Age 65 Without Health Insurance
North Carolina, 2016

Number Uninsured, Under Age 65
(# of Counties)

- Greater than 25,000: 6
- 20,000 to 24,999: 20
- 10,000 to 19,999: 29
- 5,000 to 9,999: 20
- 2,500 to 4,999: 25
- Less than 2,500: 1

- Mecklenberg: 112,129
- Wake: 84,547
- Guilford: 49,069
- Forsyth: 37,955
- Durham: 33,038
- Cumberland: 30,261

Percent Uninsured, Under Age 65
(# of Counties)

- Greater than 20%: 1
- 16.0% to 19.9%: 14
- 13.0% to 15.9%: 38
- 10.0% to 12.9%: 43
- Less than 10%: 4

- Duplin: 20.1%
- Union: 9.9%
- Cabarrus: 9.8%
- Onslow: 9.6%
- Wake: 9.2%

Safety Net Defined

Institute of Medicine definition: Safety net providers are “those providers that organize and deliver a significant level of health care and other health-related services to uninsured, Medicaid and other vulnerable populations.”

Core safety net providers are those who “either by legal mandate or explicitly adopted mission, offer care to patients regardless of ability to pay; and a substantial share of their patient mix are uninsured, Medicaid and other vulnerable patients.”

Federally Qualified Health Centers

• Federally qualified health centers (FQHCs) include Community Health Centers, Migrant Health Centers, Health Care for the Homeless Programs, and Public Housing Primary Care Programs.
  • Must be located in or serve a high needs community
  • Must be governed by a community board. The majority of Board members must be community members served by the FQHC.
  • Must provide comprehensive primary health care services as well as “enabling services” that promote access to care (eg, care management, interpreters, transportation)
  • Must provide services to all with a sliding scale fee structure
Federally Qualified Health Centers

- In North Carolina, there are 41 centers with 216 sites.
- North Carolina FQHCs and Look-Alikes served 508,599 patients in 2016.
FQHCs More Likely to Treat Underserved Populations

Data Sources: FQHC Data from HRSA. 2016 Health Center Data. North Carolina data from US Census (Race, Poverty), Pew Research Center (Ethnicity), Kaiser Family Foundation (insurance coverage).

Number Uninsured, Under Age 65
(# of Counties)
- Greater than 25,000 (6)
- 10,000 to 24,999 (20)
- 5,000 to 9,999 (29)
- 2,500 to 5,000 (20)
- Less than 2,500 (25)
- One FQHC Site

Produced by: Program on Health Workforce Research and Policy, Cecil G. Sheps Center for Health Services Research, University of North Carolina at Chapel Hill.
Rural Health Clinics & State Designated Rural Health Centers

• Rural health clinics are federally designated primary care providers that are located in medically underserved areas
  • 85 federally-certified rural health clinics in North Carolina (2015)
  • Must accept Medicare and Medicaid patients. Are not required to serve the uninsured but many do so.
• Medical Access Plan (MAP): Eligible rural health center organizations can receive state funding to help pay for indigent care (patients with incomes <200% FPL).
  • 14 state-funded rural health center organizations with 17 sites are currently funded through the Medical Access Plan
Number of People Under Age 65 Without Health Insurance, 2016 and Location of Rural Health Centers, 2018
North Carolina

Number Uninsured, Under Age 65
(# of Counties)

- Greater than 25,000 (6)
- 10,000 to 24,999 (20)
- 5,000 to 9,999 (29)
- 2,500 to 5,000 (20)
- Less than 2,500 (25)

- One CMS RHC (n=65)
- One NC ORH RHC (n=7)
- One CMS and ORH RHC (n=8)

Free Clinics

• Free clinics are generally staff by volunteer health providers and provide care to uninsured with incomes below certain income threshold.
  • Approximately 85 free clinics serving patients in 70 counties around the state
  • Some of the smaller clinics operate 1-2 nights/week; others are open more regular hours
  • 24 offer emergency dental (generally extractions only); 60 offer specialty clinics for people with chronic conditions
  • Served ~73,500 patients in 2016
  • Provided ~$234 million in donated services

Local Health Departments

- 85 local public health departments (LHDs)
  - 79 LHDs are single-county health departments, 6 are multi-county district health departments (covering 21 counties)

- Services provided:
  - Nearly all provide child immunizations, STD testing and counseling, TB testing, and family planning
  - Almost all provide WIC and prenatal care
  - Half provide dental services
  - More than 40% provide comprehensive primary care to either adults or children (or both)
NC Health Departments Provide Broader Range of Health Services than Counterparts Nationally (NC 2017/US 2016)

- Substance abuse services: US 11%, NC 14%
- Behavioral health: US 10%, NC 14%
- Childhood immunizations: US 100%, NC 88%
- Adult immunizations: US 100%, NC 100%
- TB screening: US 38%, NC 84%
- EPSDT: US 100%, NC 100%
- Diabetes screening: US 34%, NC 74%
- STD treatment: US 63%, NC 85%
- HIV/AIDS screening: US 62%, NC 66%
- WIC: US 98%, NC 100%
- Family planning: US 11%, NC 53%
- Prenatal care: US 27%, NC 79%
- Oral health/dental: US 28%, NC 46%
- Comprehensive primary care: US 11%, NC 45%
- Home health: US 20%, NC 34%
- School health: US 20%, NC 42%

Private Providers Also Care for the Uninsured

- 2008 Health Tracking Survey found that 59.1% of physicians reported providing charity care (free or reduced cost care)
- No information on what has happened since ACA implementation

![Providers Accepting New Patients (US, NC, 2012)]

Behavioral Health Programs

- LMEs/MCOs provide some mental health, substance abuse and IDD services to some uninsured.

- According to the NC DHHS:
  - “There is considerable unmet need in most parts of the state, particularly among uninsured individuals and in rural areas of the state;
  - The amount of unmet need varies by county, disability and payer, with the uninsured being far less likely to receive services.”

Dental Safety Net

• Some FQHCs, LHDs, and free clinics provide dental services to the uninsured
  • Most free clinics have limited hours of operation/week
• However, uninsured still far more likely to report access barriers

Dental Access Barriers and Needs

- Have not seen a dentist for 5+ years (or ever)
  - 30% Uninsured
  - 11% Insured
- Had 1 or more permanent teeth extracted (not all)
  - 40% Uninsured
  - 64% Insured

NC Community Health Grants

• In SFY 2018, NC General Assembly appropriated $15M for the NC Community Health Grants Program
  • “(i) to provide primary and preventative medical services to uninsured or medically indigent patients and (ii) serve as a medical home to these vulnerable populations”
  • May be used for primary care services, dental, pharmacy and/or behavioral health services if built into the medical home

• Grant funds have been allocated to:
  • 45 Free Clinics ($5.1M)
  • 26 FQHCs ($3.5M)
  • 54 Health Departments ($4.3M)
  • 5 School Based Health Centers ($617K)
  • 3 Hospitals ($390K)
  • 5 Others ($630K)
  • 3 Rural Health Clinics and Centers ($228K)

Pharmacy Assistance Programs

• Pharmaceutical companies provide some drugs at no cost to the uninsured with incomes below certain limits
  • Eligibility criteria and application process varies by company and by drug
  • ORH has created “The Pharmacy Connection” software to help facilitate application to pharmacy assistance programs through different pharmaceutical companies
    • Software operating in 102 sites in 83 counties

• 340B drug discount pricing program
  • Provides deeply discounted medicines to certain safety net providers including but not limited to FQHCs, certain hospitals, and health departments (for certain medications only)
Hospitals as Safety Net Providers

• Hospital Emergency Departments (EDs) are a major source of care for the uninsured
  • The Emergency Medical Treatment and Active Labor Act (EMTALA) requires hospitals that participate in Medicare and that have EDs to screen and stabilize anyone who requests treatment at the emergency room, regardless of ability to pay.

• NC hospitals provide charity care and financial assistance for eligible patients (hospitals define their own eligibility criteria)
  • Nonprofit hospitals must offer financial assistance policies in order to maintain tax exempt status.
  • In 2015, North Carolina hospitals reported providing more than $1B in charity care

The Emergency Room as a Source of Care

• Controlling for other variables, adults with Medicaid were most likely to report seriousness of the medical problem as the reason for their most recent ER visit.

• Adults with private coverage were more likely to visit the ER because the doctor’s office was not open.

• Uninsured are more likely to visit the ER because they lack access to other providers.

Even Though Safety Net Organizations Exist, Uninsured Adults Generally Have Poorer Health Status, Less Access To Care

<table>

Limitations of Primary and Acute Care Safety Net

• While safety net capacity exists in some communities, they are not adequate to provide healthcare for uninsured:
  • Lack access to specialty services
  • Access to pharmaceuticals limited - rely on charitable programs, donated drugs
  • Access to behavioral health services limited
  • Access to dental care almost non-existent in many communities for the uninsured
  • Existing safety-net resources not well integrated in many communities

• Historically, less than half of the uninsured use or are aware of a safety net provider in their community

Safety Net Programs: Conclusions

*Many other safety-net programs exist, but:*

- Not always available in every community
- Most programs have limited funding
- Funds generally not adequate to serve all needy individuals
  - Services sometimes “rationed” based on severity of condition or use of waiting lists
