

Geospatial Decision Making: The South Carolina National Guard Data-Driven COVID-19 Response

Christy Jacobs, GIS Program Manager

- **SC National Guard leadership relies on GIS as the primary source of information to drive decision making during the COVID-19 mission.**
- **ArcGIS Dashboard became the primary tool for COVID-19 response decision making.**

“I’m being briefed three times a week, but I’ve relied on that dashboard almost hourly for more than 300 days.”

~Major General Stephen B. Owens~

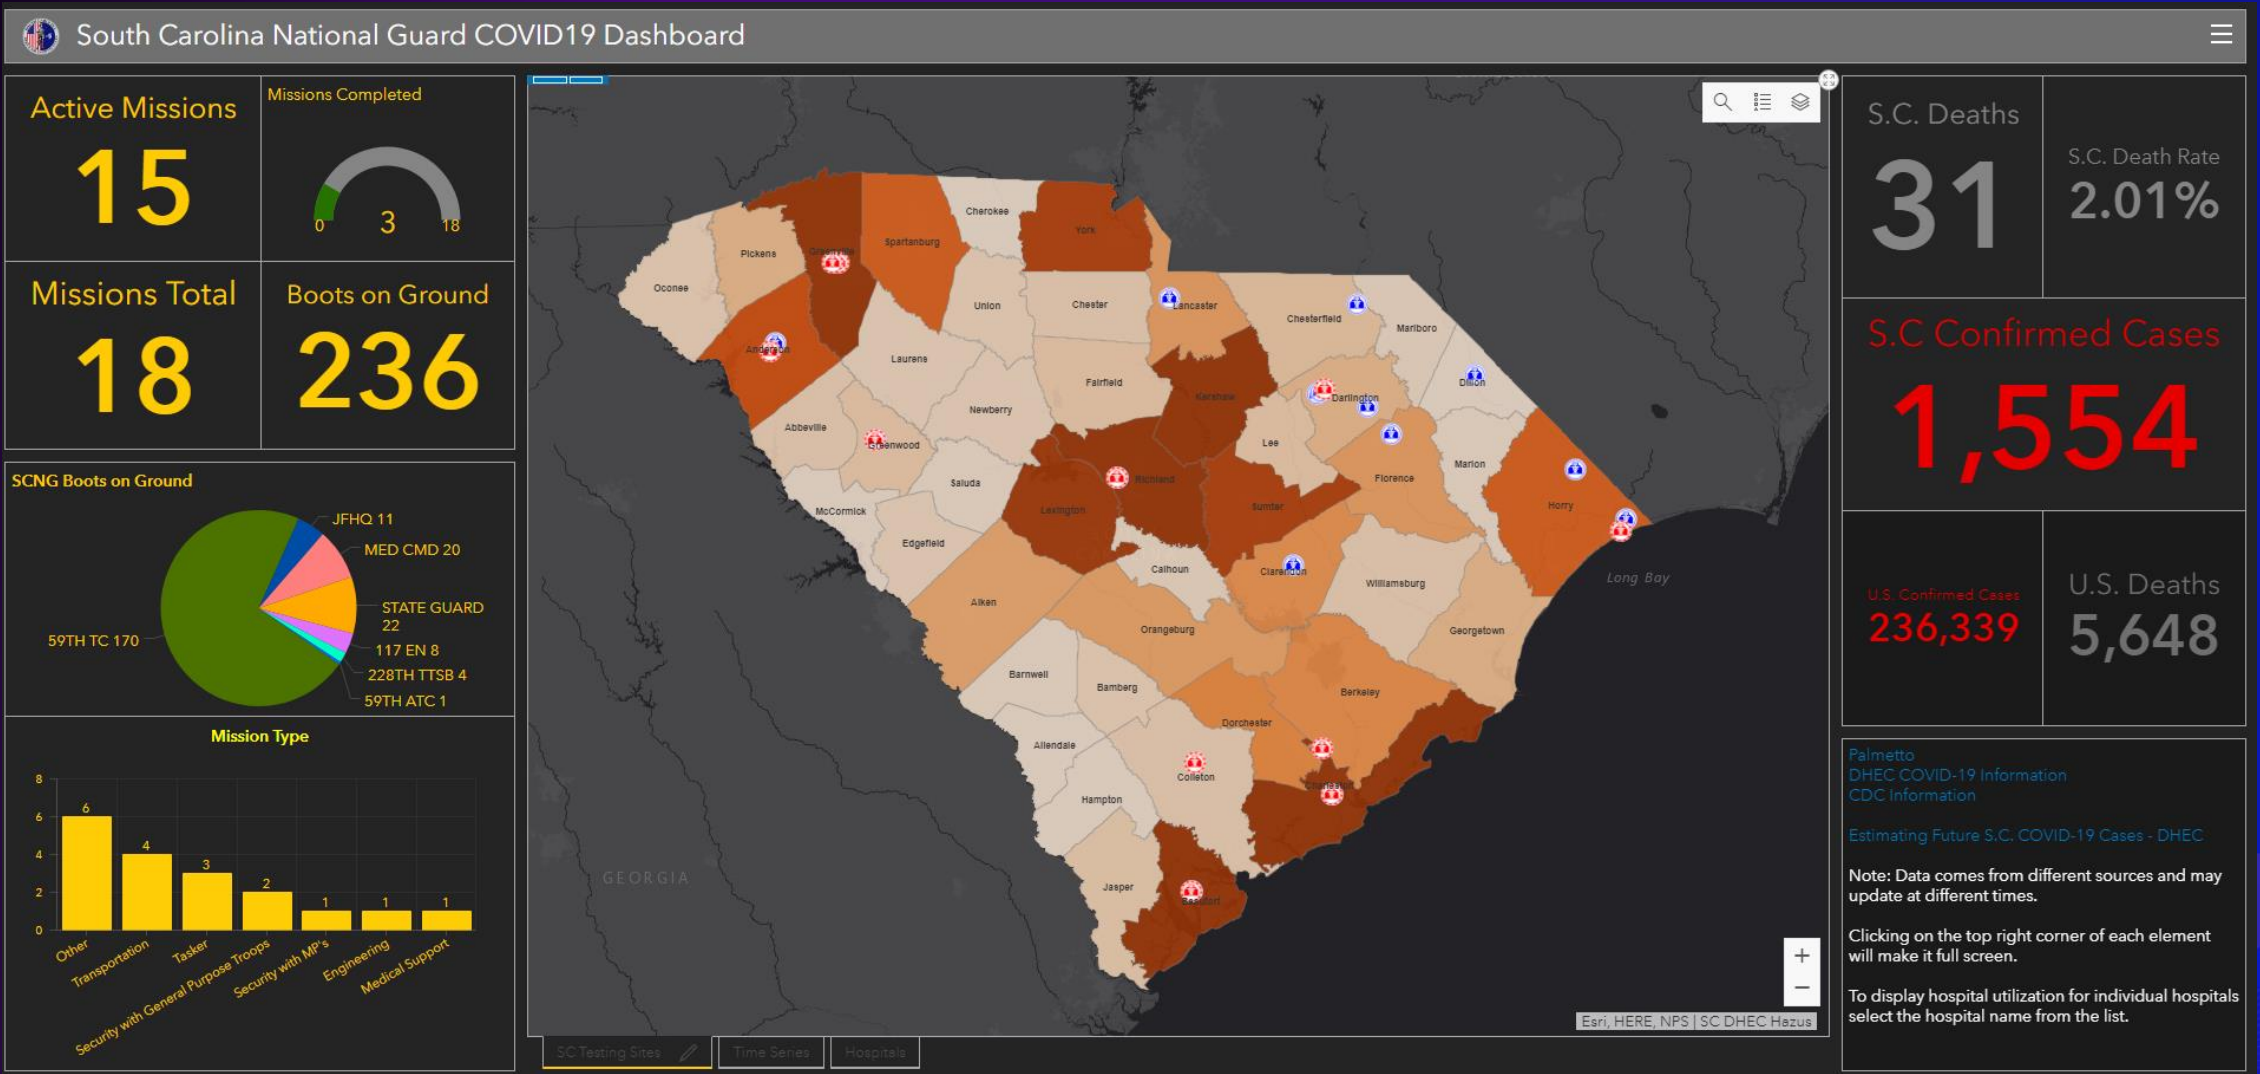

Assistant Adjutant General overseeing all of the SC National Guard COVID-19 response.

COVID Testing Site Suitability Analysis with Rural Health Clinics

Clarendon County

-  Hospital
-  Rural Health Clinics
-  DHEC Approved Testing Sites

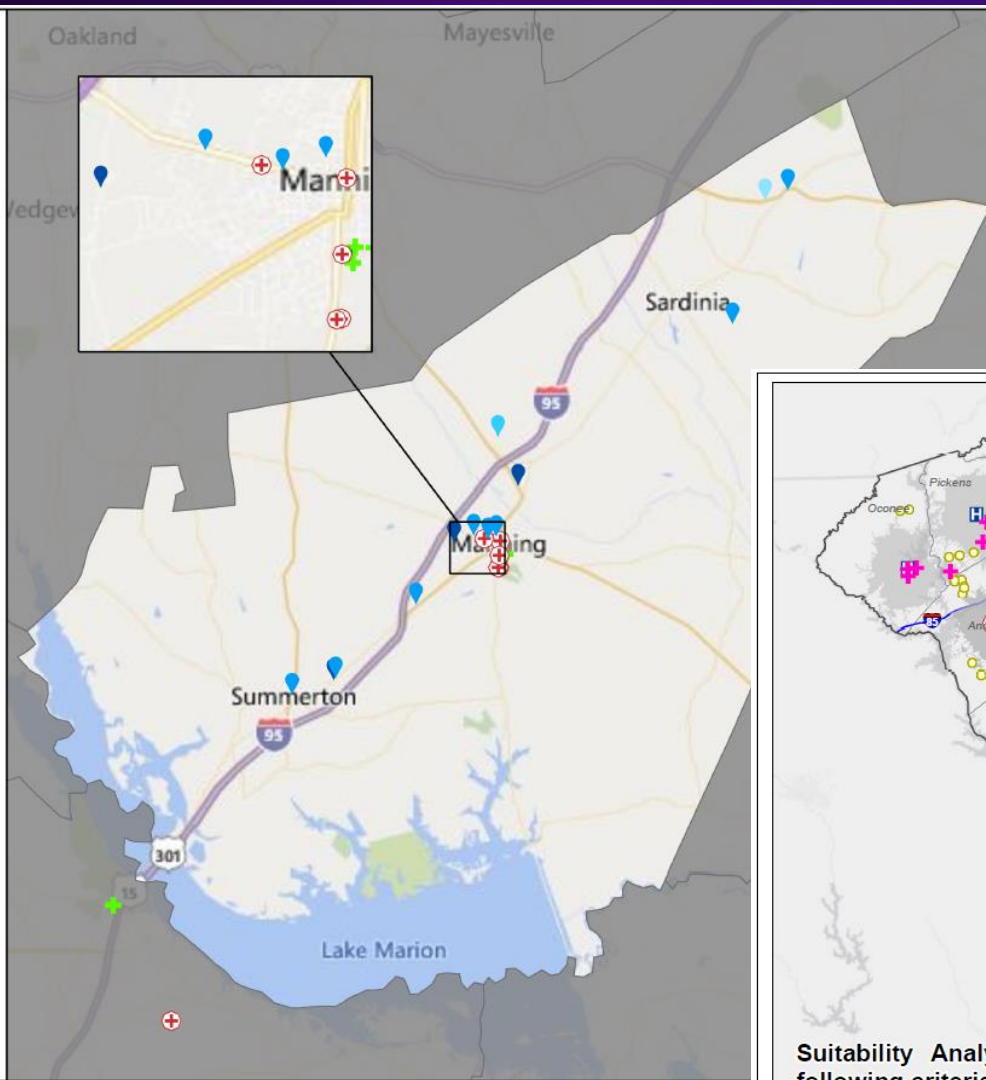

Rank of Suitable Testing Sites

-  ≤0.21
-  ≤0.66
-  ≤0.81
-  ≤0.87

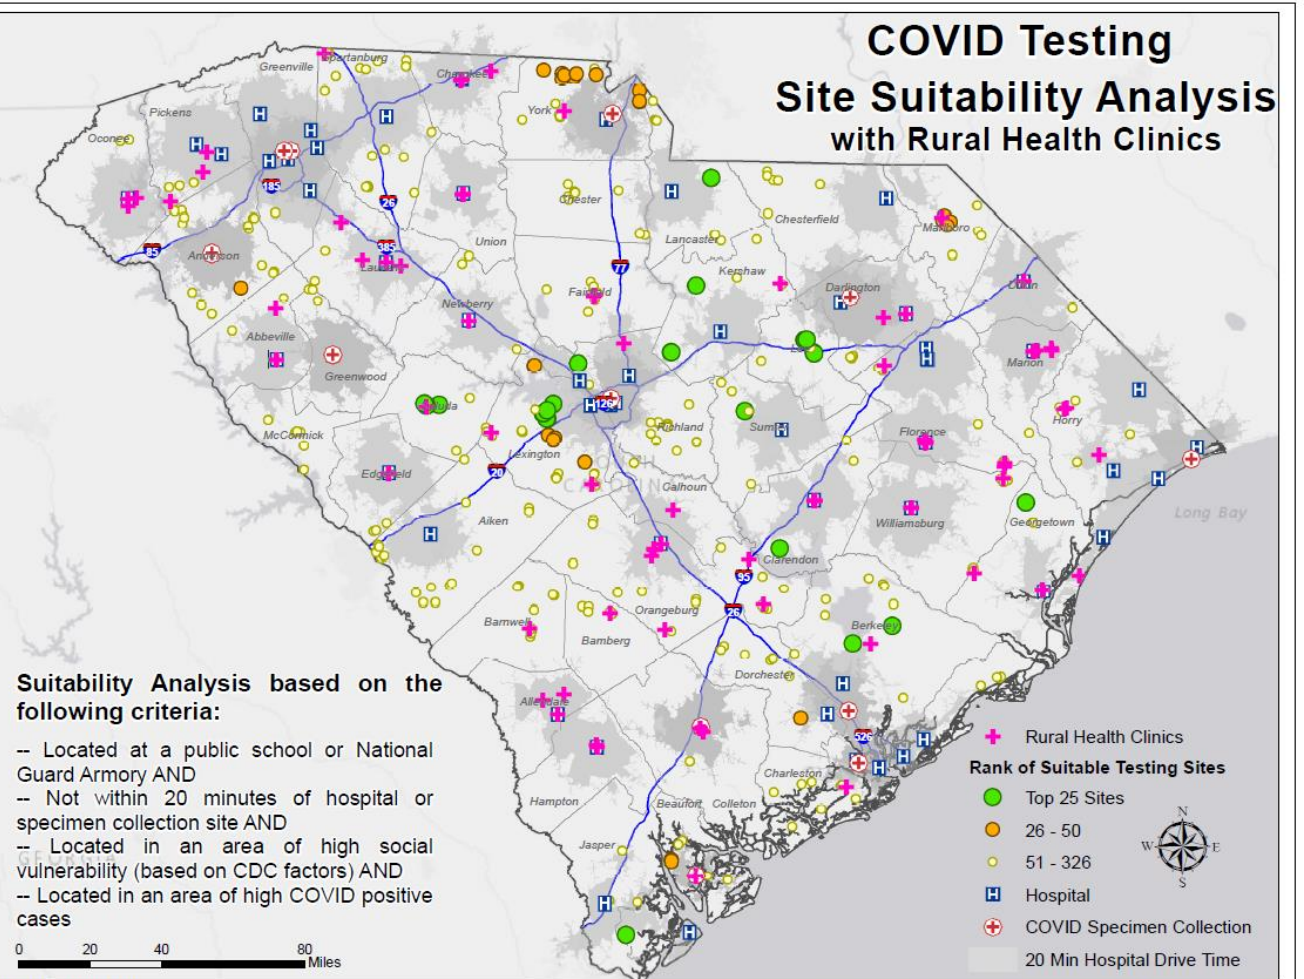

Suitability Analysis based on the following criteria:

- Located at a public school AND
- Ranks based on
 - High Social Vulnerability Index (Based on CDC) -60% Weight
 - High Covid19 cases - 20% Weight
 - Not near another testing facility - 20% weight

Date: 07 May 2020

COVID Testing Site Suitability Analysis with Rural Health Clinics

Suitability Analysis based on the following criteria:

- Located at a public school or National Guard Armory AND
- Not within 20 minutes of hospital or specimen collection site AND
- Located in an area of high social vulnerability (based on CDC factors) AND
- Located in an area of high COVID positive cases
