

Carolinas Pandemic Preparedness Task Force – North Carolina

Background Materials – Meeting 4

Meeting Theme and Context

During this meeting, we will hear from key perspectives on the challenges faced by the health care workforce during the COVID-19 pandemic with a focus on the January/February 2021 peak in cases, as well as what is needed to achieve workforce stability and resilience moving forward. Toward the end of the meeting, we will discuss potential areas of action, what it would take for proposed changes to be effective, and how progress could be measured in small synthesis groups.

Carolinas Pandemic Preparedness Task Force – North Carolina

Background Materials – Meeting 3

Meeting Theme and Context

This meeting will focus on a six-month timeframe of the COVID-19 response (May – November/December 2020) with a focus on impacts on historically marginalized and vulnerable populations in North Carolina. By focusing on this period in time, we would like to center the discussion on issues faced after the initial “[scramble](#)” to identify and understand the virus, but before the vaccination campaign and the peak in cases in January 2021. Toward the end of the meeting, we will have a large group discussion on “the fourth wave” to hear from the task force about the current landscape of the response and consider opportunities for actionable recommendations.
